**Subject:** RE: U&O FIP: Reporting Requirements

I won't be at today's meeting. I have a conflict.

**Subject:** RE: U&O FIP: Reporting Requirements

I think we theoretically are supposed to only ask for reporting of information related to demonstrating compliance with the FIP requirements. This FIP targets VOC emissions specifically, so I think, because one of the triggering factors for the significant requirements is facility-wide VOC emissions being above 5 tpy and aggregate tanks/dehyds/pneumatic pumps VOC emissions being above 4 tpy, I think we could justify requesting reporting of facility-wide VOC emissions, with emission unit specific breakdown, to verify which requirements apply.

**Subject:** Re: U&O FIP: Reporting Requirements

For this rulemaking do we have an opportunity to collect (or seek) information on emission sources we know very little about and that are not accounted for in emission inventories? e.g. well liquid unloadings? produced water (tanks on each wellpad and evap ponds)?

Cindy

**Subject:** RE: U&O FIP: Reporting Requirements

Future annual inventories for the Uinta basin will include everything in the current workbook (attached). We will likely expand this to include additional sources and facility detail for next year. I'm wondering if there is a general way we can solicit information without listing specific sources/processes?

**Subject:** U&O FIP: Reporting Requirements

Chris,

You mentioned yesterday that you are hoping that we can build the Uinta Basin periodic emissions inventory update information gathering into the FIP. What would we need to ask for to be included in annual reports to satisfy your EI needs?

Claudia
